

Spring Health Assessment

Created on Jan 29, 2024

21

Total Spring libraries used

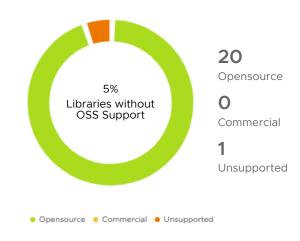

Findings

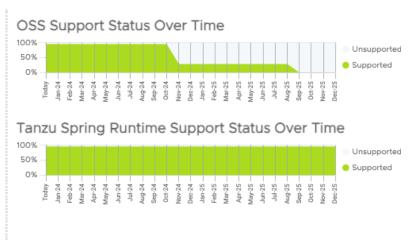

Your percentage of supported libraries will reduce from **95%** to **28%** over the next 9 months.

Recommendations

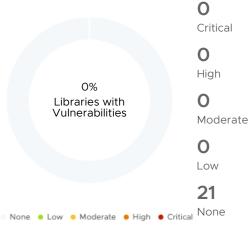

Purchase Spring Runtime to extend your support until Jan 29, 2025, for 20 libraries which are set to expire in 9 months.

Disclaimer and Known Limitations

Please Read Carefully

This report provides an assessment of the Spring libraries used within your project, detailing support status, security vulnerabilities, and migration efforts. It is essential to understand the scope and limitations of this assessment:

- Our vulnerabilities database is updated every 3 hours. If a new vulnerability appears over that period, it will not be included in the report.
- The vulnerabilities introduced by transitive dependencies do not consider overridden versions through dependency management.

- You do not always require full upgrade to mitigate the vulnerabilities reflected in the report. Sometimes, you can alternatively overwrite a dependency.
- Projects with N/A dates include projects that are run by the community or are not yet supported by the Spring team.
- This service is still in BETA, which means that we can not guarantee a 99.5 availability.

Should you encounter any issues or anomalies in this report not listed above, we strongly encourage you to contact our support team for a detailed review and assistance in UTC+1 working hours.

Support Contact
